## EXPERIENCE

### Whocomply | Founder & Lead Developer

October 2024 - Present

Led the development of a compliance automation platform that helps enterprise organizations streamline regulatory compliance processes.

- Architected and developed a full-stack compliance management solution from concept to beta phase in 6 months
- Built a dynamic workflow engine that automates document collection and validation based on configurable business rules
- Implemented a form builder system that allows end-users to create custom compliance forms without coding
- Created an intuitive UI/UX with guided tours and contextual help systems
- Established CI/CD pipeline to enable continuous development and quick iteration

### Compugeen UK Limited, London, London —Head of Engineering –Remote

August 2024 - Present

- Led the engineering department to deliver high-quality, scalable, and secure software solutions.
- Defined and executed the technology strategy, aligning it with business goals to drive innovation and efficiency.
- Managed cross-functional teams, ensuring high performance, collaboration, and adherence to best practices.
- Spearheaded the adoption of modern software architectures, including microservices, serverless computing, and cloud-native technologies.
- Established engineering KPIs, including sprint completion rates, defect resolution times, and system uptime, achieving 99.9% reliability.
- Implemented rigorous code quality and security standards using SonarQube, ESLint, and Husky to ensure best practices across the

## SKILLS

Engineering Management, Problem-solving, Strategic Thinking, Technical Leadership, Skills Management, Software Development(Node, Typescript, Javascript, Php(Laravel), VueJs, React, Aws services, GCP, Database Management, Core Java (Desktop, Android, Web), Serverless architecture, Postgres, MySQL, MsSql

Most Valuable Employee –  
CURACEL

Honors Diploma in  
Information Technology

## LANGUAGE

English

codebase.

- Designed and optimized developer workflows, reducing sprint cycle times by 25% and improving deployment efficiency.
- Worked closely with stakeholders, product managers, and clients to ensure seamless product delivery and customer satisfaction.
- Mentored and coached engineers, fostering a culture of continuous learning, technical excellence, and innovation.

## **Ownage FDT, Wisconsin, Wyoming, United States —Technical Consultant-Remote**

March 2023 - Present

- My primary goal is to ensure that every technical aspect of a project is well taken care of.
- I also hire talents for projects as needs arise
- I have overseen over 7 Projects and still counting.
- I have worked on projects spanning diverse tech industries.

## **KotaniPay, Nairobi County, Kenya —Senior Software Engineer R & D-Remote**

May 2023 - January 2024

- I work mainly on the continuity of products acquired alongside Fuhlstack
- Pioneering the Research and development of products.
- Built a robust ledger system for on-prem inter-node communication

## **Fuhlstack, Delaware, United States — Head of Engineering -Remote**

March 2023 - August 2023 (Company got acquired by KotaniPay)

- Created workflows to facilitate team bonding among engineers
- Saw to the completion of multiple projects handed over by the C.T.O
- Monitored the hiring of engineers and hired three more people to the team to increase the team's output
- Mentored junior colleagues (Tech & Soft Skills)
- I Built the v1 of an agonistic B2B product, solving reconciliation and settlement problems.

## **Curacel(YC Backed), Lagos — Senior Software Engineer -Remote**

August 2020 - March 2023

- Working with a team of engineers to enhance and develop a claims collection and fraud detection platform

## **REFERENCES**

John Flash Dada  
[CTO, Curacel](#)

Abayomi Akintomide  
[Software Engineer, Google](#)

Lemuel Okoli  
[CTO, Stealth AI-Web3 Startup](#)

- Worked to improve the code base for performance
- Led multiple projects across insurance and financial technology
- Core contributor to other projects within the company
- Mentored junior colleagues (Tech & Soft Skills)
- I Led the insurance infrastructure project. We are building the pipeline for easy insurance adoption.

## **OneLiquidity, Dubai, AE — Senior Software Engineer**

*(Independent Contractor) –Remote*

April 2022 - March 2023

- Pioneered building infrastructure for value-added services
- Led building of trading APIs, running over 28.5 million dollars monthly worth of trade volume
- Integrating cross-border Payout and payment collection systems
- Created a subscription service to control access to other services
- Worked to improve the code base for performance
- Led multiple third-party integrations across services and teams
- Mentored junior colleagues (Tech & Soft Skills).

## **Softkave, Indianapolis, Indiana, United States — Software Engineer –Remote**

November 2018 - November 2020

- Worked as a part-time product manager
- Led brainstorming sessions that birthed multiple products
- Remodeled the API to communicate via sockets
- Created a real-time chat system which was added as a feature in the boards' app
- Mentored interns

## **Dosh Services, Lagos — Software Engineer (Contract)**

July 2020 - August 2020

- Worked majorly on restructuring already made code-base

## **Sunbeam Product studios, Lagos, Nigeria— Backend Developer/Native Android Developer –Remote**

February 2020 - July 2020

- Organized the team and helped create reusable libraries for in-house projects
- Created API with Strapi
- Worked on 2 Android applications

## **NIIT, Lagos — Java Faculty**

February 2019 - February 2020

- Introduced students to Java Programming

- Mentored Students on programming in Java Web, Desktop, and mobile.
- Supervised Project from planning to completion

## **Excellon Data World, Ado-Ekiti— *Data Analyst***

August 2015 - December 2017

- Worked as a data analyst using Microsoft Excel

## **EDUCATION**

**Ekiti State University, Ado-Ekiti, Ekiti State — *B.Eng B.Tech Computer Engineering***

**NIIT, Lagos, Nigeria — *Professional Diploma in Information Technology - Honors***

## **MAJOR PROJECTS**

### **TFS**

A simple CLI-based file-sharing app designed to securely share sensitive files. Currently working on adding a CDN feature to enable more use cases of the product.

[TFS](#)

### **Approve|Deny**

It streamlines digital processes with authentication checks. Built with the security of the users and processes in mind. It utilizes multifactor authentication and also 2FA for approval and denial processes.

[Approve|Deny](#)

### **Reconset**

A reconciliation and settlement tool. It utilizes strong blockchain security features and has a node-node communication setup. It automates reconciliation and settlement.

[Reconset Landing](#)

## **Softkave Chat and Task Management App**

This project is a workstation majorly created for startups and built on a real-time connection using custom sockets.

*It is currently taken down for maintenance.*
